

Are Midsummer trade discounts reflected within Heatpunk?

[Heatpunk](#) and [Midsummer](#) accounts can be linked for accurate pricing. When logged into your Heatpunk account, head to the My Account > Preferences > Connect to Midsummer. Here you can link your accounts by entering the email and password associated with your Midsummer account. Unless a trade link is established, Heatpunk displays retail pricing as standard.

For more information on this topic, see our guide on [Connecting to Midsummer](#).
