

Does Heatpunk integrate with Midsummer?

Though existing as a separate entity, **Heatpunk** designs can be transferred to [Midsummer Wholesale](#) by clicking "*Looking to build a whole kit?*" from the Project Overview page. This takes you to our Kit Builder on the Midsummer Wholesale website. The heat pump and cylinder you have entered will be pre populated. The kit builder will then suggest additional component you may need which you can edit as necessary. Once finished everything is added to your basket ready for purchase.
