How do I add dormers?

Dormers can be added to any vaulted ceilings.

To add a dormer simply drag and drop the **Gable Dormer** or **Shed Dormer** function onto where it is required. The dormer will automatically orientate itself with the slope of the roof. The specific dimensions can then be set, as well as the roof, wall, and window materials.

For more information on this topic, see our guide on Vaulted Ceilings and Dormers.
